Thank you! to review possible health benefits of CBD oil Posted - September 11 201700:00 Share: FDA to review possible health benefits of CBD oil The Federal Drug Administration has asked to review the possible health benefits of cannabidiol, better known as CBD, but federal law prohibits it from reviewing whether hemp is safe or effective. According to the Florida Consumer Health Advocacy Coalition, CBD is a compound derived from hemp oil that can be taken orally or in tinctures. However, FDA has specifically stated that "FDA cannot review whether products that contain cannabidiol (CBD) are safe and effective, or whether the public should be warned about such products". The agency said it would also conduct a review of CBD that is added to food and dietary supplements. The medicinal benefits of CBD include helping to ease pain and inflammation and may also help relieve anxiety. CBD has been touted as a possible treatment for various diseases including Alzheimer's disease, schizophrenia and diabetes. The FDA has instructed companies to report on any potential health benefits of the compound, but companies can't promote its benefits without FDA review and approval. CBD could prove to be a healthier alternative to marijuana, cannabis, and other psychoactive drugs
