Get the latest version of Photoshop for the best results. Understanding the Photoshop Interface In its simplest form, Photoshop is an image-editing program that enables you to create, edit, enhance, transform, and save your digital images. It consists of a number of toolbars that enable you to do the kinds of things shown in Figure 11-1. **Figure 11-1:** In Photoshop, the toolbar controls specific functions and lets you adjust levels and more. The Toolbar is where the bulk of the actions that you perform take place. The Toolbar has several buttons and most of them control the various features of Photoshop's editing functions. Figure 11-1 illustrates the main toolbars in Photoshop CS5. The View and Image Adjustment toolbars are where you most likely work with images while using Photoshop. The View Toolbar includes image formats, a thumbnail screen, filters, and options for changing crop, color balance, contrast, and size. The Image Adjustment Toolbar includes options for the preset Adobe tools (including the Levels, Curves, and Adjustment Layers, as well as channels and histogram adjustments) and the adjustment options for the basic tools. The Tools Options, History, and History panel are additional tools that are described in the later section "Setting up your workspace." Designing in Photoshop One of the best things about Photoshop is that it's perfect for all aspects of graphic design — from simple cartoon characters to impressively complex logos and paintings. With Photoshop, you have access to all the power and convenience of computer-based tools without having to own the equipment. As with all types of design, the process begins with the concept, an idea of what you want your final piece to look like. After your concept is approved, Photoshop begins the real work of turning your concept into reality. Photoshop CS5 offers an interface and tools that enable you to create and place 3D artwork and textures. This is the first version of Photoshop to support 3D features, such as the ability to rotate the image and place a 3D texture on top of it. Additionally, it has sophisticated color correction features that enable users to make subtle modifications to the image and preserve the image's original look. You can find out more about 3D in Chapter 16. To get into the actual work of creating your image, all you have to do is start the process from the file menu on the main window. You

in the morning. "Look at that," Gerald said. "Look. Someone's awake." Something round, dark, moving and quivering in the dark, bumped into them and Gerald jumped. "I thought it was going to hit me!" He gasped. "It's moving like a jellyfish or something. For God's sake, be careful." The slug's dim red eyes were directed straight down through the water, coming dangerously close to Rix's belly. It pulsed and lumbered forward again. Rix loosed a squeal of terror. The thing was a millipede. And it was headed straight for him. Gerald was about to clout him on the head, when he was caught in the wave and swept away. Rix seized the millipede, which was more than twice his size, and dragged it out of the water. It quivered in his hands, so vivid and fleshy it looked wet. "Hell's bells," he gasped. "I've never seen anything like it." "It's not a millipede, you idiot. I thought so at first. A couple of the rings are floppy, but the little ones... they're like arms." Rix's heart was pounding as he examined it. "No, no... it's a... a..." He held it out in front of him, three rings going all the way round its body, their joints pulsing. "A statue of an animal. I think..." Gerald took it from him and it flopped down on his hand. "It's like the picture from the film. A cryptid, like the one that killed Lord Kurtwood." Gerald's hand didn't move. "Do something, you fool!" "It's dead." "Yes, you pampered idiot, but it was a corpse, an animate corpse, and it's coming back to life. Take it away." Gerald's face grew white, then turned red. He smashed the statue into the glowing water. Rix leaped back as the lake spat it out. A scratchy voice said, "I am back." The following day was dreary and overcast, the weather trapping Rix in his room. The other boys were back from yesterday's trip to the home. They were all padding up and down the stairs, wearing
