PowerDVD Ultra 2017 Full Version.The influence of the amount of methacrylated chitosan on the mechanical properties of the composite chitosan-chitosan. A new composite containing methacrylated chitosan (MChit) and the two commonly used methacrylated cellulose derivatives, methylcellulose (MMC) and hydroxypropylmethylcellulose (HPMC) was produced. Its thermal, mechanical, and surface properties were studied. It was found that the addition of MChit had little influence on the melting point and the crystallinity of the chitosan. The tensile strength of the composite was influenced by the amount of methacrylated chitosan present. The presence of MChit also affected the moisture absorption of the composite. HPMC e79caf774b
