This is a weird game that looks like something that can be a part of an exhibition. Basically the entire game revolves around a tower that you have to climb up as you progress. On each floor there is a special task and you need to complete it in order to move on to the next floor. As you climb up the tower, you unlock more and more rooms that will help you through your journey. It's a simple premise with simple controls that have a rather interesting look. It's one of those games that you have to play through and understand. Most games are designed for quick exploration and look at something from a different point of view. It's simply a tower in which you need to climb and unlock new areas. The game is designed to use the unique interface that it has and while there are not many things to do outside of playing through the tower, you are encouraged to explore and do what you like. That being said there is one major downside to the game: the UI. The UI doesn't make any sense at all and looks like something that a developer threw up quickly. With such a simple premise, the UI doesn't need to be this big and garish. Some graphics can add to the atmosphere but this one really does not. It is all very boring and some textures are just downright awful. The game really needed to have a decent UI design and while some simple fonts are used, it just doesn't work. Every time you move around and enter a new room, you will be greeted by this awful menu which is static. You can't even change anything and you can't scroll through things either. This is a game that looks good but needs to look better because it doesn't. It's a shame because it is a game that could have had so much potential but because the developer rushed it, the final result is not worth the time and effort. Tower of Approval has an interesting premise and is an interesting game to play through. There are many things to unlock and do, but

everything feels rather gimmicky and strange. Some of the items are simply pointless but at the same time they fit into the game so they don't feel out of place. However there is also plenty of items that can be used and some of them make sense and feel like they would work. The game is a bit hard to get into because there isn't much to do except to play
