Powder metallurgy and its use in the production of metal alloys is well known and described in numerous text books, and commonly used in the production of powders for compounding into metal alloys. While the book "The FDM Process" by R. M. Wade (ISBN 1-56530-030-0) has many useful references, the patent literature has been particularly rich in new developments. For example, Samulski U.S. Pat. No. 5,170,169 discloses a method of preparing boride powders. The art is also filled with publications which disclose specialized processes which are particularly useful with certain alloys, e.g., U.S. Pat. No. 4,781,792 disclosing the c6a93da74d
